We believe that membership of the Fork Lift Truck Association (FLTA) is a mark of quality. The FLTA set the standard in the materials handling industry, helping enhance safety and productivity on it's member's premises. As a result, we have managed to obtain a discount for FLTA members based on demonstrated evidence that an FLTA members usually have fewer fork lift claims. To benefit from this contact Matthew Kilgallen to discuss your requirements further.

We are often asked if off-the-shelf or a simple motor trade policies will cover the specific risks you encounter. Our feeling in that many areas of risk fall outside a standard policy, but also you may be paying for cover that is not relevant to your trade.

The backbone of our policy is that we know your business and we have taken the time and training to understand the issues you face day to day. A confirmation of this commitment is our membership and activities within the FLTA. This means we are not only there to support you, but also to keep updated with the progression and changes within the industry.
